JABA SERIES

[JABA] Series

New JABA series of Cryo-Pride is equipped with cutting edge COSCOM (Combination Of Single Compressor Operation Mode) technology by two independent compressor mechanisms.

Combination of VIP(Vacuum Insulation Panel) and insulation by high pressure injection enable maximum insulation as well as lowest energy consumption for keeping your valuable samples with maximum safety. Auto Cascade system with COSCOM technology protects your samples from any risk other than blackout. With low noise and all time monitoring "Blackbox" service, our JABA series shall be successful companion of your comfortable research.

Main Features

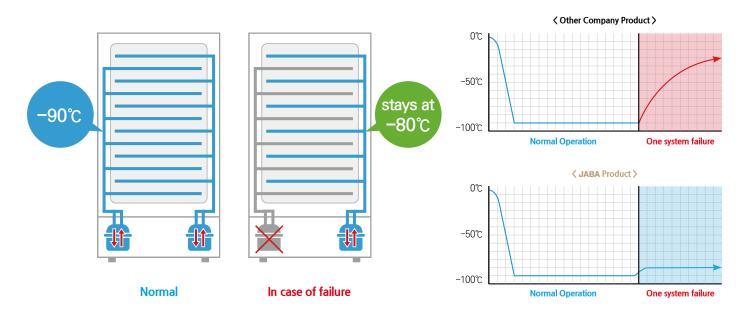

JABA SERIES

No worries, No hassles in any emergency-

1. INDEPENDENT COOLING SYSTEM

COSCOM System

Two independent cooling mechanisms. One cooling systems maintains -80℃ in case of system failure.

2. 24/7 real time monitoring BLACK BOX service

GLOBAL REAL TIME CARE SERVICE

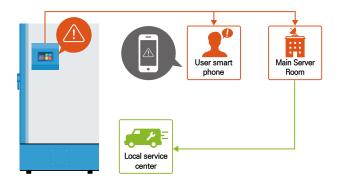

Remote monitoring by Internet of things technology

Manufacturer's central monitoring server gives 24/7 real time monitoring by IoT technology. In case of any event, server gives notices to user and designated service team.

Central server monitoring data

- 1. Temperature: Chamber temperature of the freezer
- 2. Trend information: Temperature variation for last 24 hours
- 3. Alarm event: Compressor over temperature, compressor over current, system overheat, temperature sensor failure, power off, low voltage, cold alarm, warm alarm and door open alarm.

Prompt and proactive action

User can find any events by application of smart phone. Diagnosis and corrective action are noticed.

*App. OS: Android 2.3 (Gingerbread) or above, IOS 9.2 or above

Any event alarm goes to user' smart phone and to main server. Main server shall review history data of the unit and prompt diagnosis is executed. Service action is instructed proactively!

< Conventional service protocol >

Step	Processing details
1	Checking symptoms
2	Service request
3	Engineer field visit and diagnosis
4	Service parts request
5	Engineer visit for repair
6	System reactivated

Complication, time consumption

< New JABA service protocol >

Step	Processing details
1	Event happens, service instruction provided
6	Completion of service

No hassle, Non-Stop service!

No need for searching your samples!

1. INVENTORY MANAGING SYSTEM

4. data review by touch and scroll- TREND DATA

Graph

- Review on the screen over 43,000 hours past trend.
- USB download of data is available.

5. monitoring in your hand- MOBILE CONTROL

Mobile remote control

Monitoring and control by mobile application is available with your computer, Lap top, smart phone or tablet PC.

CONTROL SYSTEM MOBILE APPLICATION

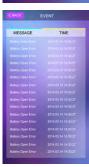

* Log in

Mobile App account open and log in.

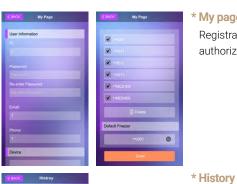

* Main

Setup, My page, Temperature graph, Event menu. Real time monitoring page.

* Event

Alarm events display and review.

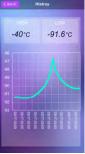

* My page

Registration of user unit. Service authorization.

Present data and trend data for

last 43,000 hours on screen.

Parameter setup, password setup and authorization control.

* Setting

Better protection and lower energy consumption!

1. POWERFUL INSULATION

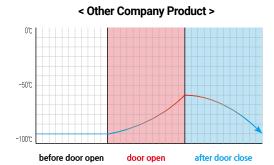

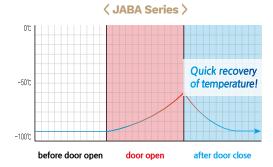

Improved insulation

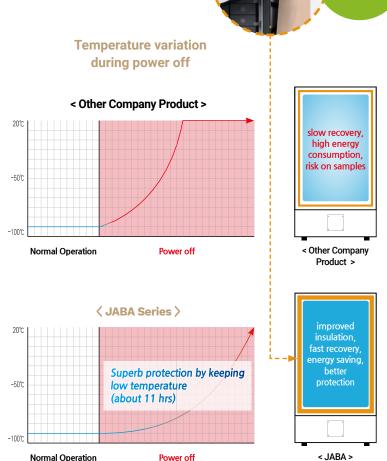

Combination of VIP and PU provides better insulation that enables fast recovery of chamber temperature.

Temperature change before and after door open/close

Don't get bothered by loud noise anymore

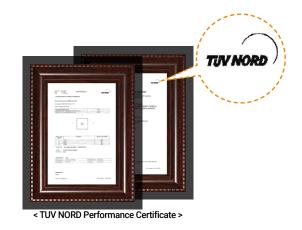

1. LOW NOISE STRUCTURE

Designed for low noise

Comfortable work environment is provided. Noise level is as low as home refrigerator.

Low noise below 55,1dB(A)

GUDERO PLUS SERIES

[GUDERO PLUS] Series

Gudero Series was introduced in 1988 and has been upgraded since then. New Gudero Plus Series is equipped with COSCOM technology for double safety and robust quality. Easy user interface is beneficial for long term depository by simplified control parameters with only 3 buttons.

Main Features

GUDERO PLUS SERIES

Independent cooling mechanisms

1. DOUBLE SAFETY

*COSCOM system

Even with failure of one compressor, temperature is still maintained at -80°C.

Easy Control by 3 Buttons

2. SIMPLIFIED CONTROL SYSTEM

*Micro process control system

Gudero Plus is optimal for long term bio-depository with easy user interface and simplified performance.

No worries about overheat or dust accumulation!

PIN-LESS CONDENSATION SYSTEM

*Pin-less

No need for cleaning, no need for filter replacement. Compressor overheat is prevented.

GUDERO CHEST SERIES

Gudero Chest Series is optimal for long term storage of large size samples at the range of -90° C $\sim -120^{\circ}$ C.

-10 ℃ ~ -120 ℃ Gudero Chest lineup is with reliable cascade refrigeration technology. With accumulated know-how, micro process control system provides easy and hassle free long term bio-depository solution.

Main Features

GUDERO CHEST SERIES

Light and handy

1. POLYETHYLENE INNER DOOR

Self-diagnosis function, smart & easy maintenance

2. SELF-DIAGNOSIS FUNCTION

Temperature and voltage parameters are monitored and alarm is generated at any emergency situation.

Temperature check by one glance

MONITORING SYSTEM

RS-232 and 485 communication port allows real time monitoring by personal computer.

POCKET SERIES

Main Features

POCKET SERIES

Convenient access

COMPACT DESIGN

Table top or under counter storage is possible even with small space. Fast and easy access is privilege of Pocket series.

If you need more storage?

2. 2nd STACKING

Easy build up without need of more space.

QUICK FREEZER

ODF SERIES

[QUICK FREEZER]

General use of deep freezer is long term storage of samples but special samples such as blood and specific reagents need prompt freezing for keeping their properties.

QDF Series is optimal solution for fast and reliable freezing without chance of any damage on your samples.

Main Features

QUICK FREEZER

DETAIL & FEATURES

DEEP FREEZER

Smart Monitoring Application

24/7 monitoring available on your smart phone. Proactive notice from command room in case of alarm event.

Finger Print Door Lock

Enhanced security: by finger print registration or by card key.

Inner door for each shelf

HDPE inner doors minimize cold air loss.

Powerful insulation

High pressure injected POLY URETHANE with 130mm thickness keeps temperature less than 3℃ between chamber inside and outer wall.

Control panel

- 1) TFT LCD 7" Touch Screen
- 2) Smart Microprocessor control

Sliding Rack

Convenient storage by separated racks with sliding mode.

Anti-explosion door lock

Auto relief system(open & close) works in case of high pressure formed inside of chamber. Key set is provided for locking function.

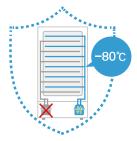

Black Box

Manufacturer's central monitoring server gives 24/7 real time monitoring by IoT technology. In case of any event, server gives notices to user and designated service team.

< CENTRAL SERVER MONITORING DATA >

- 1. Temperature: chamber temperature of the freezer.
- 2. Trend information: temperature variation for last 24 hours.
- 3. Alarm event: compressor over temperature, compressor over current, system overheat, temperature sensor failure, power off, low voltage, cold alarm, warm alarm and door open alarm.

Coscom system (Combination of single compressor operation mode)

Even with failure of one compressor, temperature is still maintained at -80℃. Fast pull down to -90°C and energy efficient ECO mode.
